

HEDI BEN HAFSA

Game Programmer

Introduction

Game programmer experienced in Unity and Unreal Engine, with strong knowledge of C# and solid foundations in C++. I have worked on multiplayer systems and ECS architecture, and I enjoy designing scalable gameplay systems and solving networking challenges.

Projects

ExtractionZ

Unity - C#

Third-year final project, a 3 vs 3 multiplayer game produced in hybrid ECS, where I focused on the multiplayer aspect, synchronising the main gameplay elements across the network.

The Fallen One

SFML - C++

Second-year final project, where I was able to create a boss, as well as the player and their various mechanics.
